**DETAILED ACTION*****Drawings***

The drawings are objected to for not complying with 37 C.F.R. 1.84(i) which requires that the plane upon which a sectional view is taken should be indicated on the general view by a broken line, the ends of which should be designated by numerals corresponding to the figure number of the sectional view and have arrows applied to indicate the direction in which the view is taken (also see the specification, page 4, line 2, and page 6, line 21).

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Specification***

The disclosure is objected to because of the following informalities:

On page 5, lines 11 and 12, “brushless direct current type or brushless DC type” is redundant, since these types are the same.

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 to 10, 12 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 15 and 16, stating that “the bottom and side surfaces being defined by the compressor housing” does not clearly set forth the structural relationship between these surfaces and the compressor housing.

Claims 2, 7, 12 and 15 recite an “insulating member”. However, it is not clear what physical parameter is being insulated. For example, does the insulating member insulate against heat transfer, electrical current, etc.?

Claims 7 and 15 recite “a second insulating member”. However, none of the claims on which these claims depend recites a first insulating member.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3 to 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Anschicks et al (DE 19859340). Anschicks et al disclose an electric motor driven pump having an electric motor 9 which drives a hydraulic pump (not shown) via flange 10. See figure 3 which shows side walls 3 and a bottom wall which form an accommodating space which contains circuit board 12. The bottom and side surfaces are readable as “being defined by the compressor housing”.

Claims 1, 3 and 4 are also rejected under 35 U.S.C. 102(b) as being anticipated by Robertson et al (US 6,132,184). Robertson et al disclose an electric motor driven pump having an electric motor 12 which drives a hydraulic pump 164. Accommodating space 26 is formed by side walls and a bottom surface which are readable as “being defined by the compressor housing”.

***Allowable Subject Matter***

Claims 11, 13, 14 and 16 to 19 are allowed.

Claims 2, 6 to 10, 12 and 15 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Art Unit: 3746
